

Sprint Wholesale

International Private Line

Offer your customers a high-bandwidth alternative for highly intensive voice, data and video applications

Available in more than 110 countries, Sprint Wholesale International Private Line services offer flexible bandwidth options from voiceband to OC-3 speeds. An advanced network design and more than 76,000 miles of fiber worldwide can provide high reliability for private line communications.

With International Private Line services from Sprint Wholesale, you can make the best selection of private line capabilities, from integrated, high-volume, high-speed applications to economical, application-specific services requiring customized bandwidth. The advanced design of the Sprint network can provide outstanding reliability and millisecond service restoral.

In a half-circuit service, Sprint provides the domestic portion from your location to a Sprint global digital cross-connect system (DCS) and onward to a transoceanic facility. Sprint along with a global carrier provide service in the terminating international locations.

For an end-to-end private line, Sprint offers U.S. or worldwide origination to selected locations in Asia (Sydney and Tokyo) and Europe (Brussels, Paris, Frankfurt, Amsterdam and London).

Features

Sprint Wholesale International Private Line offers outstanding features for your customers and your own network.

- Exceptional fiber-optic network with a choice of private line speeds from T1/E1 to STM-4, including fractional DS3 (based on local availability)
- Industry-leading service level agreements (SLAs)*
- Half-circuits worldwide or dedicated end-to-end full circuits in select locations
- Channelized bandwidth supports both voice and data services on a single line
- Reliability of the Sprint synchronous optical network (SONET)/synchronous digital hierarchy (SDH) platform assures millisecond service restoral across the network (available in select locations)
- Dedicated account team and Sprint Physical Layer Center deliver end-to-end, 24 x 7 support

One Sprint. Many Solutions.™

Benefits

With Sprint Wholesale International Private Line you can:

- Enjoy completely private communications services and dedicated bandwidth worldwide
- Gain peace-of-mind with reliability and availability of the Sprint nationwide network
- Tailor bandwidth to the needs of each application or location
